Great developers!

Tips on becoming a better software developer

Evance Soumaoro (@evanxg852000)

$~/ Whoami?

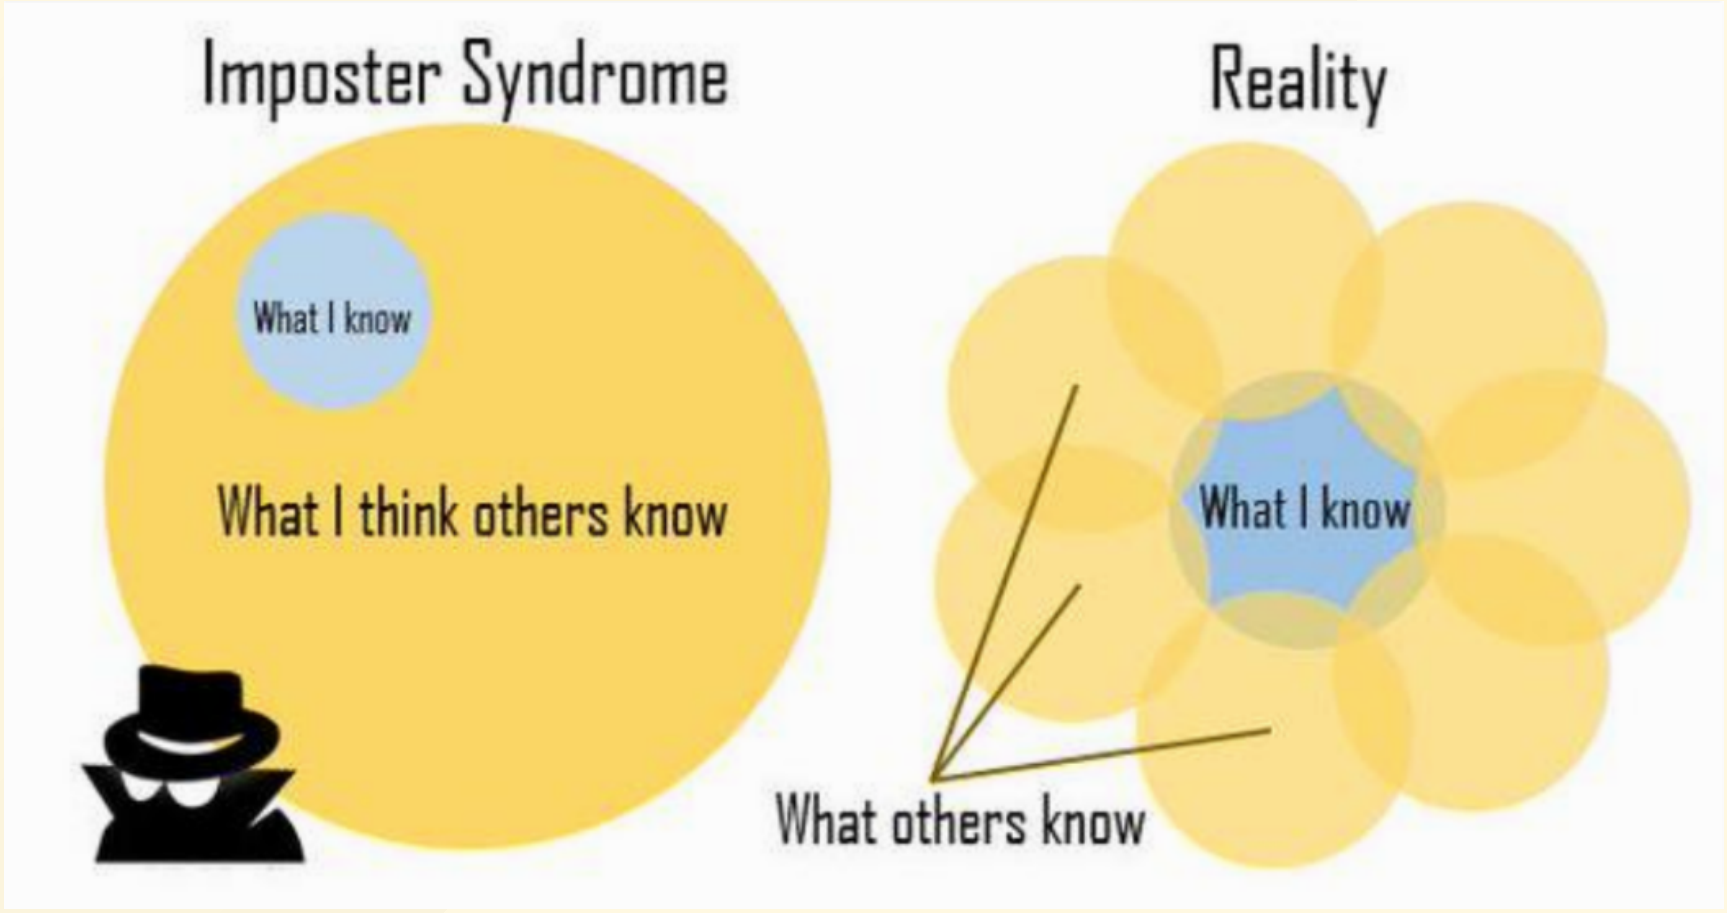
```
$ ~/ senior-software-developer@ehealth-africa
$ ~/ enjoy-working-with
$ ~/ c++ php java csharp python js etc...
$ ~/ like
$ ~/ all internal stuff: os compilers, db engines
```

(1)

Practice, Practice, Practice ...

(2)

Do not fall into the imposter syndrome trap.



Imposter Syndrome
What I know
What I think others know
Reality
What I know
What others know

(3)

Strive to prove yourself wrong.

(4)

Never settle on a working solution.

(5)

Don't take your tasks as assignements.

(6)

Learn to apreciate the weird/different.

Run away from comfort...

> If you are willing to do only what's easy, life will be hard. But if you are willing to do what's hard, life will be easy.

~T. Harv Eker

(7)

Always have a side project.

(8)

Read source code, a lot.

(9)

Master techniques, not tools.

> One day a monk visited Master Wq, and inquired, "Master, how will my code be different when I have mastered Vim?"
>
> Master Wq answered, "Before Vim: declare, define, process, print. After Vim: declare, define, process, print.

~ Vim Koans

(10)

Mind your body

Questions?

Happy coding!
